ACKNOWLEDGMENTS

Thanks to A. V. Zinovev and C. E. Tripa for their technical assistance. This work was partially supported by the U.S. Department of Energy, EERE-Solar Energy Technologies Program, under FWP-4913A (ALD synthesis of CZTS films) and Office of Science, Materials Sciences and Engineering Division (SIMS characterization of CZTS films) and NASA through Grant NNNH09AM48I (SARISA facility: development of instrumentation and methodology for dual-beam depth profiling). Electron microscopy was accomplished at the Electron Microscopy Center for Materials Research at Argonne National Laboratory, a U.S. Department of Energy Office of Science laboratory, operated under Contract No. DE-AC02-06CH11357 by UChicago Argonne, LLC.
