2001, Vol. 1

Francesco Neve* and Alessandra Crispini C-H...Br-M Interactions at Work: Tetrabromometalates of the Bola-amphiphilic *N,N*-Dodecamethylenedipyridinium Cation

Page 392: Figure 7 was published incorrectly. The corrected version appears below.

Figure 7. Statistically corrected³⁸ plots of the H...Br distance (represented as R^3) vs. (left) the C-H...Br angle (represented as $1 - \cos(\theta_1)$, where $\theta_1 = 180 - (\text{C-H}\cdots\text{Br})$). $R = d(\text{H}\cdots\text{Br})/(r_{\text{H}} + r_{\text{Br}})$, where r_{H} and r_{Br} are the van der Waals radii of H (1.20 Å) and Br (1.85 Å); (right) the M-Br...H angle (represented as $1 - \cos(\theta_2)$, where $\theta_2 = 180 - (\text{M-Br}\cdots\text{H})$).
